2 Powering Innovation with Policy Alignment

In a democratic country like India, the public is the most vital stakeholder. Public sentiment, discourse and participation shape national agendas and ensure accountability. Institutions, particularly those serving the public sector, must align their actions with societal expectations. Mechanisms like Public Interest Litigation (PIL), civic engagement and

3 What does design do for policymakers?

Multidisciplinary policy design teams are changing how public policy is made. This blog is for anyone who is interested in how policymaking is being modernised.

4 Vision 2030 For the Textile Industry

To enhance cotton productivity and quality, promote innovation and strengthen the entire textile value chain in line with Vision 2030, a five-year 'Mission for Cotton Productivity' was announced by the Hon'ble Finance Minister in her budget speech 2025-26.

5 Product Thinking is Problem Solving

The first step of product thinking is to determine the problem that your users are looking to solve. That's the reason that they will buy your product (as long as it solves the problem in a meaningful and valuable way).
